Dr. Kaliprasanna Dhara is a retired Indian organic chemist and former professor in the Department of Chemistry at the University of Calcutta. He is widely recognized for his research in natural product chemistry and synthetic organic reaction methodologies, as well as his academic association with renowned Indian chemist Prof. Asima Chatterjee.

Academic Background & Career

- **Education & Mentorship:** Dr. Dhara earned his PhD in 1978 from the University of Calcutta under the guidance of Prof. Asima Chatterjee. He later completed post-doctoral research in the Department of Forest Products at Virginia Tech from 1987 to 1989.
- **Faculty Positions:** He began his teaching career as a faculty member in the Department of Chemistry at Kalyani University (1978–1981). He then joined the Department of Chemistry at the University of Calcutta, where he served as a professor from 1981 until his retirement in 2017.
- **Visiting Roles:** Following his retirement from Calcutta University, he has remained active in academia as a visiting faculty member for the postgraduate chemistry department at Behala College in Kolkata.

Research & Scientific Contributions

- **Areas of Specialization:** His primary research focuses on the chemistry of natural products, green synthesis protocols, heterocyclic compounds, and organic reaction methodologies.
- **Publications & Supervision:** He has supervised several doctoral scholars at the University of Calcutta and co-authored numerous peer-reviewed research papers in journals such as *RSC Advances*, *Synthetic Communications*, and the *International Journal of Biological Macromolecules*.
- **Academic Talks:** As a former doctoral student of Prof. Asima Chatterjee, Dr. Dhara is frequently invited to deliver commemorative lectures on her life and contributions to Indian medicinal plant research.
